EDUCATION

Aditya University, Surampalem <i>Bachelor of technology in Electronics and Communication Engineering</i>	Aug 2023 - Present CGPA: 7.07
Subha Niketan School, Kakinada <i>Class 12, CBSE Board</i>	April 2022 - May 2023 Percentage: 67
Ravindra Bharathi Global School, Chennai <i>Class 10, CBSE Board</i>	2020 - 2021 Percentage: 71.2

EXPERIENCE

Centre of Excellence in Maritime and Shipbuilding, Visakhapatnam <i>IOT/Embedded Systems Intern</i>	May - July 2025
- Explored core concepts in IOT and Embedded Systems through real-world use cases. - Developed a embedded firmware for microcontrollers (e.g., ARM, ESP32) using c/c++ and python. - Developed integrated sensors (e.g., temperature, humidity, motion, ultrasonic) with Embedded platforms like Arduino, Raspberry Pi. - Contributed to system integration with cloud platforms like Blynk, AWS IoT Core. - Created and deployed firmware updates over-the-air (OTA) to IoT devices. - Interfaced with cloud-based dashboards using Node-RED, ThingSpeak to visualize live sensor data.	

PROJECTS

Simple Translator Using Python Libraries Python	Oct 2025
- Developed a simple language translator using Python and popular libraries such as googletrans, translate, or TextBlob. - Implemented text translation functionality between multiple languages with minimal latency. - Designed a user-friendly interface for real-time language conversion. - Added support for multiple languages, allowing users to translate text between a wide range of language pairs.	
File Manager C/C++	Nov 2024
- Developed a File Manager system in C that simulates basic Operating System file operations. - Implemented core functions like create, delete, read, write, rename, and copy files using C file handling. - Implemented error handling for invalid commands, missing files, and permission issues. - Integrated multi-threading to enhance performance, allowing multiple file operations to run concurrently.	
Blender-Based CS2 Workshop Asset Design Blender	June 2024
- Designed and modeled a custom CS2 workshop weapon skin using Blender, including UV unwrapping and texture painting. - Applied optimization techniques to keep texture sizes and reflections suitable for in-game performance. - Developed high-quality textures for realistic in-game appearance. - Exported and packaged the skin for Steam Workshop submission, ensuring compatibility with game standards.	
Library Management System MySQL, Python	Jan 2023
- Developed a Library Management System using SQL and Python, designed to streamline the process of managing books, users, and loans in a library. - The system enables users to borrow books, track loan statuses, and manage due dates. - Key functionalities include searching for books, adding new books, and maintaining a record of all transactions related to borrowing and returning books.	

TECHNICAL SKILLS

Programming Languages: Python, C/C++, SQL, HTML/CSS,
Developer Tools: Git, Google Cloud Platform, VS Code, PyCharm, Blender
Libraries: pandas, NumPy, Matplotlib
